---

## EXPERIENCE

### Front-end developer Intern

Aug 2025 – Nov 2025

### The Engineer Network

Lagos, Nigeria

- Built responsive [Ople Weather App dashboard](#) using OpenWeather API, improving forecast accuracy
  - Developed [Recipe Finder app](#) with React Portals & LocalStorage, reducing reload errors by 60%
  - Implemented offline detection and error handling, maintaining app functionality during connectivity issues
  - Conducted 3 code reviews, resolving 6 API-related bugs to improve code reliability
  - Presented weekly demos to senior engineers, improving team adoption of UI/UX best practices
- 

## PROJECTS

### NEWS SUMMARIZER | Lead Developer

Dec 2025 – Present

- Built ETL pipeline for RSS data into Supabase, reducing latency by 30%
- Integrated Google Gemini AI for automated news summaries, cutting reading time by 50%
- Implemented secure authentication with React Context and session persistence
- Refactored utilities to TypeScript, fixing 12 runtime errors and improving maintainability
- Optimized UI rendering, improving dashboard load speed by 40%

### Private Collaborative Project (Pre-Launch)

Jan 2026 – Present

- Architecting internal tool with backend devs, defining APIs and JSON contracts
  - Designed sitemaps and user flows to optimize navigation and UX efficiency
  - Managed version control with GitHub, feature branches, and PR workflows
- 

## TECHNICAL SKILLS
